

Gardner, G.T. & Stern, P.C. (2002). Environmental problems and human behavior (2nd ed.). Boston, MA: Pearson Custom Publishing.

Includes:

Part 1: Introduction

Ch. 1- The earth's environmental problems and the role of human behavior, pp. 1-20

Part 2: Environmental problems as "tragedies of the commons"—Behavioral solution strategies

Ch. 2- Environmental problems as tragedies of the commons, pp. 21-32

Ch. 3- Religious and moral approaches changing values, beliefs, and worldviews, pp. 33-70

Ch. 4- Educational interventions: Changing attitudes and providing information, pp. 71- 94

Ch. 5- Changing the incentives, pp. 95-124

Ch. 6- Community management of the commons, pp. 125-152

Ch. 7- Combining the solution strategies, pp. 153-174

Part 3: Human behavioral predispositions as aids or barriers to solutions

Ch. 8- Stone age genetic behavioral predispositions in the space age, pp. 175-204

Ch. 9- Human reactions to environmental hazards: perceptual and cognitive processes, pp. 205-252

Part 4: Behavioral Solutions in Context: Ecological and Societal Systems

Ch. 10- Choosing the behaviors to change and the points of intervention, pp. 253- 276

Ch. 11- Human interactions with complex systems: "Normal" accidents and counterintuitive system behavior, pp. 277- 316

Ch. 12- Human interactions with complex systems: Chaos, self-organizations, and the global environmental future
